Communications is becoming a requirement for many IBM Personal Computer applications. The enclosed literature describes the unique benefits of the Bizcomp PC:IntelliModem(TM) in satisfying those needs. It is more than just a modem ... it is an advanced communications system addressing the convergence of voice and data functions.

Here are some of the major contributions the PC:IntelliModem offers to the IBM user:

- 300/1200 Baud Plug-In Board
- Integrated Voice and Data
- Telephone Line Status Monitoring
- Full Programmatic Control
- On-Line Telephone Directory
- Two Year Warranty

At a price of \$499 (including software), the PC:IntelliModem provides the complete communications solution at a price you can afford. Ask your authorized IBM dealer about the Bizcomp advantage.

Sincerely,
BIZCOMP
